REST API

SQL

AWS

JSON Web Tokens

SCSS & SASS

EDUCATION

Full Stack Web Development Certificate

University of Washington

2020

Montana State University

2018 - 2019

EXPERIENCE

Associate Web Developer

Bungie / Bellevue, WA / March 2021 - Present

Developed product & game related pages as the primary web developer for the marketing department, solely handling the implementation of almost every marketing page.

- Ensured the customer and their experience was at the forefront of every design and implementation decision made.
- Successfully integrated a new CMS into the tech stack to increase productivity across design, dev, and localization teams.
- Significantly improved performance and load times of all new pages through the implementation of several best practices such as using WebP images and lazily loading content, among others.
- Worked in an agile scrum workflow to provide continual site updates with two-week sprints.
- Worked closely with at least three other internal teams for any given project, including editorial, design, and localization teams.
- Worked with analytics teams to implement A/B test pages for different marketing campaigns.
